

NOTIFICATION OF INTENT TO DIRECT CONTRACTING

General information	
Country:	SENEGAL
City/Locality:	Dakar
Notice/Contract Number:	MCA2/24/C/CB/RE10_1B/G79_B
Funding Agency:	(MCC) Millennium Challenge Corporation
Buyer:	Millennium Challenge Account Sénégal II (MCA-Sénégal II)
Procurement name:	Implementing and extending GMAO (Computerized Maintenance Management System) to mobile application
Type of procurement:	Direct Contracting
Awarder:	IC-WA (Ingénierie Consultance West Africa)

The Government of Senegal (“GoS”) has been selected for the Millennium Challenge Corporation (“MCC”) Grant (“Compact”) and plans to allocate a portion of the proceeds of funding to the payment of contracts for goods, services and works.

The Compact includes an investment of about USD 550 million from MCC and an additional contribution of USD 50 million from the Government for a global amount of USD 600 million. It includes three major projects:

- The “**Modernizing and Strengthening of Senelec Transmission Network**” Project aims to provide quality electricity from the low-cost sources available for Senelec to meet the growing demand on the interconnected network in Senegal;
- The “**Increasing Access to Electricity in Rural and Peri urban Areas**” Project seeks to increase the quality electricity supply and demand in rural and peri urban areas in Senegal;
- The “**Power Sector Enabling Environment and Capacity Development**” Project has as objective to create an environment favorable to improving the

financial viability and good governance of the sector for a quality and quantity electricity supply.

As part of the Compact's implementation, MCA-Senegal II Procurement Plan includes the supply of Computerized Maintenance Management System (CMMS) tools and licenses for Senelec, the National Electricity Company of Senegal. This initiative aims to strengthen asset management and enhance performance by optimizing maintenance operations.

To address Senelec's operational requirements, a mobile CMMS solution with offline functionality is essential. Such a system will enable field teams to access and input critical maintenance data even in areas without network connectivity.

Senelec has utilized Coswin 8i—developed by the SIVICO Group—as its CMMS platform for the Transmission and Distribution Departments.

In this context and as per the provision provided in the Accountable Entity Procurement Policy & Guidelines 6.6.1 (c) regarding the Direct Contracting procurement method, MCA-Sénégal II hereby notifies its intent to award a contract to **IC-WA (Ingénierie Consultance West Africa)**, a branch of the ICR group (Ingénierie Consultance Réalisation) which has exclusive rights in Senegal for the integration, marketing and support of COSWIN software, with the purpose of the **implementation and the extension of GMAO (Computerized Maintenance Management System) to mobile application.**

Sincerely yours,

MCA-Senegal II
CEO

Oumar DIOP

The stamp is circular with a red border. The text inside the stamp, also in red, reads "Millennium Challenge Account - Sénégal II" around the top arc, "Le Directeur Général" in the center, and "MCA - Sénégal II" around the bottom arc. There are small stars on either side of the bottom text.
